

manifesto

commercial architectural design. and then some.
modern. communicative. alive. awake. fresh.

survey. design. project management. maintenance.

we love being ampersand.

we are architectural design experts.
and then some.

a thoroughly modern business in approach and delivery.

we love the work we do. we are thinkers. we are proactive, not reactive.

we provide true direction and solutions for our clients.
innovators, not followers.

we are an experienced-
young business.

a great bunch with skills and expertise to match.

full of energy and enthusiasm for the work we do.

ambitious and hungry for success. success for our clients
and success for us.

we are skilled. skilled in design. skilled in management.
skilled in delivery.

we are small but perfectly formed.

we listen.

we listen. listen to our clients. listen to
the market. listen to each other.

we understand architectural design. we understand project management.

we understand quality.

we make promises and we keep them.

we take our responsibilities very seriously. we provide an unparalleled
service that, in turn, provides revenue and stability for our business.

we totally 'get' our reason to exist.

we have history.

we have been architectural designers for 20 years -
experienced yet full of young energy.

we are growing. we are envied by our competitors.

not just as a result of service. not just because we are cost effective for our
clients. not just because of our delivery reputation.

but because we have the best people, with the best attitude, delivering
cutting-edge solutions that make a difference.

ready to add value.

we want to make the world a better place
wherever we can.

we play an important role in the manifestation of our clients' vision.

invisible support when required - high visibility when needed.

our people are our business.

we are alive. fresh. we have energy.

we are hungry. ambitious. capable.

we are proud. we communicate.

we are conscientious. self-believers.

we understand the role we play in our clients'
process and we take responsibility for our part.
